Introduction

In March 2004, the Pennsylvania State University, Department of Dairy and Animal Science, in conjunction with the Pennsylvania Association for Sustainable Agriculture (PASA), conducted a survey to determine the educational and training needs of meat and poultry producers in Pennsylvania. Information from this survey was used to develop this directory. This directory should not be considered a complete listing of meat processors in Pennsylvania. Processors listed are those that responded to the survey and did not request that the information remain confidential.

The developers of this project would like to thank the Pennsylvania Technical Assistance Program (PENNTAP), Pennsylvania Department of Agriculture (PDA), Pennsylvania Association of Meat Processors (PAMP), and the American Association of Meat Processors (AAMP) for their guidance, along with the processors listed in this directory for their willingness to improve the marketing of meat processing in Pennsylvania.

Directions for Use

This directory is divided into three main sections; regional maps, processor listings, and indexes.

1. Regional Maps

This section is divided into two sections, USDA Inspected Processors, and Custom Processors, or processors who do custom work. Each section contains seven regions, defined by the PDA.

These regions are listed on separate pages with the processors located in a specific region identified by number. This section is to be used by buyers who find distance a priority and enables the buyer to locate meat processors closest to them.

2. Processor Listings

Like the map section, this section is divided into two listings, Directory of USDA Inspected Processors, and Directory of Custom Processors. Processors in the first listing are all under USDA inspection. Processors in the second listing do custom work. USDA inspection for custom processors is listed by "(USDA)."

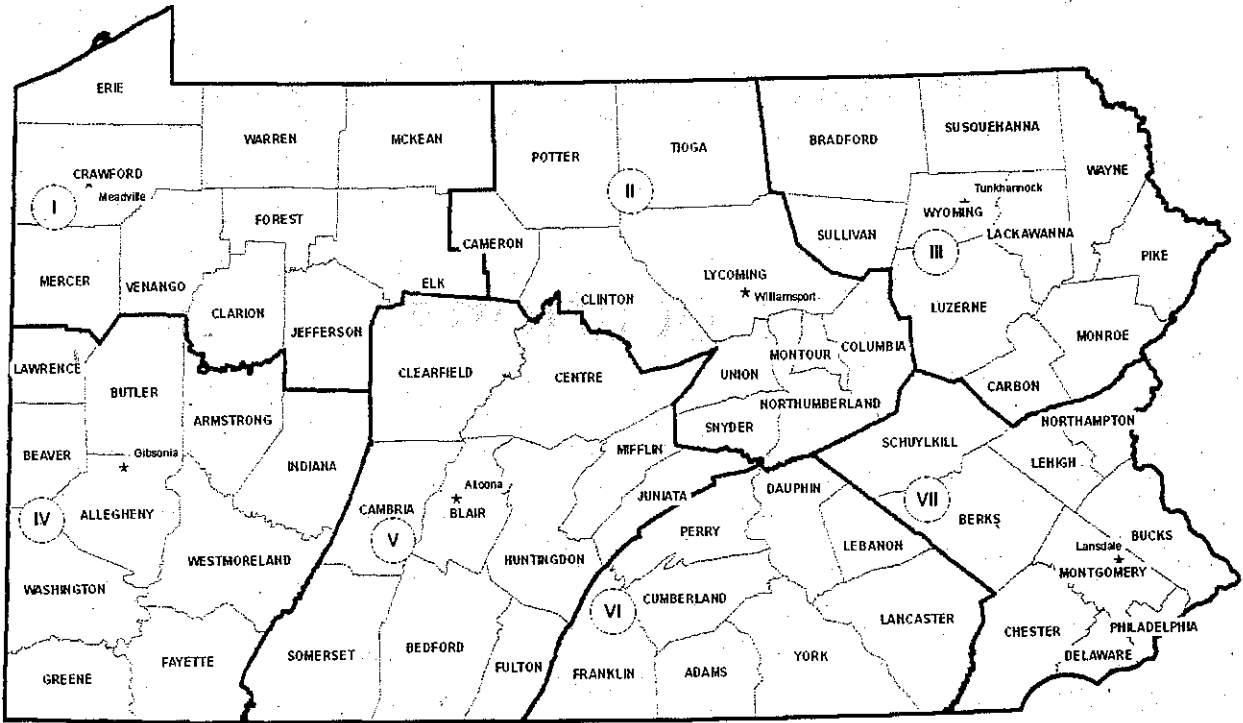

3. Indexes

This section is designed to help the user find the appropriate meat processor for their needs. There are eight indexes in this directory.

- a. Index 1: All Processors - lists all processors in the directory and on what pages they are found
- b. Index 2: Processors who Slaughter - processors who slaughter animals at their facility
- c. Index 3: Co-Production/Packaging - meat is packaged under a specific company label
- d. Index 4: Ethnic Products - ethnic labeled products include PA Dutch or German, Italian, Eastern European, Other European, Oriental, Mexican, or Middle Eastern
- e. Index 5: Religious Inspection - Halal or Kosher
- f. Index 6: Special Labeling/Production Claims - products produced with labeled production claims, such as Organic, Natural, Source Verified, Range Fed, or Grass Fed
- g. Index 7: Poultry Processors - includes processing of turkey, chicken, and game birds
- h. Index 8: Non-Amenable Species Processors - venison, bison, ratite, elk, rabbit, wild boar, bear, and moose
